

The Septic Times

GOWA Annual Conference & Exhibit

Aug. 27-28!

Callaway Gardens

Field Demo!

This year there will be **actual field demonstrations** at the Conference to demonstrate various products and construction techniques. On Friday Aug. 27, we will go to the field for hands on training on the latest products, services and equipment that will help you become a more successful contractor. None of us like to sit all day in a classroom while someone lectures us on information that we need to know but is nonetheless hard to sit through. This morning session will give you a chance to get outside and see for yourself how these products are actually used in the field! These cool morning field sessions will also provide you with 4 hours of CE. Then in the afternoon we will have 4 hours of continuing education (CE) in classroom seminars that will give you the latest information in our industry for a total of 8 hrs of Continuing Education on Friday. Be sure to bring your key field people to see this! ☺

Don't Miss This Educational Opportunity AND Earn All Your Continuing Education

This year the GOWA Annual Conference and Industry Exhibit will be held at beautiful Callaway Gardens, Pine Mountain, GA. which is near Columbus on Friday and Saturday, Aug. 27-28. The sessions will begin at 8 AM on Friday and continue all day. On Saturday we will begin at 8 AM and conclude at Noon. As always the educational seminars will be geared specifically to the onsite wastewater industry and will be the latest information that is of interest to you and your business. This is your once a year opportunity to hear what is happening in the industry in which you make your living. In these economic times, you must be thoroughly informed about everything that affects your business and this conference is the one place to receive that information. We will have speakers from various state agencies and companies who are the best source of information that you need and who will be able to answer any specific questions that you might have. Watch your emails for complete schedule, speakers and topics. Be sure to read on this page about the ...

Out Door Field Demonstrations!

As usual we will have **EXHIBITS** of all the latest in equipment, services and supplies that you need to run your business profitably. Come see and actually touch these exhibits. Talk to the sales people that can tell you all about how they can make your work easier, faster and more profitable.

Seminars Include:

- Properly Installing Conventional Septic Systems
- Trouble Shooting Alarms and Control Panels
- How to read and understand a soil report
- How to calculate what pump you need
- How to properly collect your money
- Remediators—How to install one
- Onsite Regulations
- The Health Care Bill
- Rules of the road
- Diseases in Wastewater
- Drip System Components
- New Excavation Technologies

Don't wonder what you missed. Make your plans now to attend!

Call Callaway Gardens today to reserve your sleeping room at 1-800-Callaway (1-800-225-5292). Room cutoff date is July 27 for guaranteed rate and availability. Sessions begin at 8 am on Friday so you will need to get up really early to drive to Callaway or reserve a room for Aug. 26. We had to do this to provide a full 8 hrs of CE on Friday. ☺

Have you ever wondered how your competition does it? What their little secrets are? Come to this year's conference and find out!

We know we all have a little curiosity in us. We want to know how our neighbor does it? What their little secrets are? Have you ever just wanted to go over and see how they do it? Well come to this years conference and find out. We are going to dish the dirt..... on how systems should be installed, techniques to make it easier, and most importantly, how to do it right. Discover things that you are doing that could be done better or made simpler. At this years conference we will have hands on training. You will be able to get out in the field with new technology and equipment to learn how to do things the correct way and tips that could save you time and money in the process.

Do you have a trainee in your company that just has a hard time with a situation? Send him to the conference to learn the things that can only be learned with hands on experience.

There will be teachers, operators and professionals to answer questions, as well as show different approaches to installations of all products. Do you have questions on products that you would like answered? Bring them with you and let the experts help you answer them.

This is something we have never had the ability to be able to do at a conference. Please take advantage of it and come join us. ☺
